Orientation-aware surround sound playback

     · [US11902762B2](#) · **Xiguang ZHENG** · Dolby Laboratories Licensing Corp

Priority 2014-08-29 · Filed 2022-05-04 · Granted 2024-02-13 · Published 2024-02-13

Example embodiments disclosed herein relate to orientation-aware surround sound playback. A method for generating a surround sound field based on audio on an electronic device that includes a plurality of loudspeakers is disclosed, the loudspeakers arranged in more than one dimension of the electronic device. The method includes ...

Reverberation generation for headphone virtualization

          · [US10149082B2](#) · **Xiguang ZHENG** · Dolby Laboratories Licensing Corporation

Priority 2015-02-12 · Filed 2016-02-11 · Granted 2018-12-04 · Published 2018-12-04

The present disclosure relates to reverberation generation for headphone virtualization. A method of generating one or more components of a binaural room impulse response (BRIR) for headphone virtualization is described. In the method, directionally-controlled reflections are generated, wherein ...

Method for processing audio and electronic device

     · [US11636836B2](#) · **Xiguang ZHENG** · Beijing Dajia Internet Information Technology Co., Ltd.

Priority 2020-01-22 · Filed 2022-03-23 · Granted 2023-04-25 · Published 2023-04-25

Provided is a method for processing audio including: acquiring an accompaniment audio signal and a voice signal of a current to-be-processed musical composition; determining a target reverberation intensity parameter value of the acquired accompaniment audio signal, wherein the target ...

Method and apparatus for spatial audio reproduction using directional room ...

   · [US12335717B2](#) · **Xiguang ZHENG** · Electronics And Telecommunications Research Institute

Priority 2022-02-10 · Filed 2023-02-10 · Granted 2025-06-17 · Published 2025-06-17

Disclosed are a method for spatial audio reproduction based on D-RIRs includes: selecting measurement points around a listener based on the location of the listener; calculating a D-RIR for the location of the listener based on D-RIRs for the measurement points around the listener; and reproducing ...

Enhancing intelligibility of speech content in an audio signal

     · [EP3149730B1](#) · **Xiguang ZHENG** · Dolby Laboratories Licensing Corporation

Priority 2014-05-26 · Filed 2015-05-22 · Granted 2019-06-26 · Published 2019-06-26

A method for enhancing intelligibility of speech content in an audio signal, the audio signal containing a speech component and a non-speech component, the speech component containing the speech content, the method comprising: obtaining reference loudness of the audio signal, wherein the reference ...

User experience oriented audio signal processing

     · [US9877108B2](#) · **Xiguang ZHENG** · Dolby Laboratories Licensing Corporation

Priority 2014-10-17 · Filed 2015-10-13 · Granted 2018-01-23 · Published 2018-01-23

Example embodiments disclosed herein relate to user experience oriented audio signal processing. There is provided a method for user experience oriented audio signal processing. The method includes obtaining a first audio signal from an audio sensor of an electronic device; computing, based on the ...

Combined active noise cancellation and noise compensation in headphone

      · [US10242659B2](#) · **Xiguang ZHENG** · Dolby Laboratories Licensing Corporation

Priority 2014-09-30 · Filed 2018-01-23 · Granted 2019-03-26 · Published 2019-03-26

The disclosure relates to combined active noise cancellation and noise compensation in a headphone. An audio processing device includes a selector and a noise compensation unit. The selector can select one of a plurality of first transfer functions based on at least one feature of at least one of ...

Modeling a frequency response characteristic of an electro-acoustic transducer

     · [US10038961B2](#) · **Xiguang ZHENG** · Dolby Laboratories Licensing Corporation

Priority 2014-06-09 · Filed 2015-06-02 · Granted 2018-07-31 · Published 2018-07-31

Example embodiments disclosed herein relate to modelling a frequency response characteristic of an electro-acoustic transducer. A method includes obtaining at least one measurement of the frequency response characteristic for at least one electro-acoustic transducer of the category. A model of a ...

Audio signal loudness control

     · [EP3149970B1](#) · **Xiguang ZHENG** · Dolby Laboratories Licensing Corporation

Priority 2014-05-26 · Filed 2015-05-22 · Granted 2018-05-09 · Published 2018-05-09

A method for controlling loudness of an audio signal, comprising: responsive to determining presence of a noise signal, deriving a target adjustment for perceived loudness of the audio signal in the presence of the noise signal based, at least in part, on a first factor related to the noise signal ...
